Founded in 2013, ANET International Group® SAS aims to contribute to a sustainable global agro-sylvo-economy in response to the growing demand for wood and food production.

Our strategic goal is to become a leader in green lumber production in Africa within five years.

Land is our most profitable asset

In search of a way to invest in nature while achieving returns, ANET International Group® makes an offer of **Paulownia Token™** investment tokens issued on the Waves blockchain.

It is a new and judicious form of ecological financial investment.

Paulownia Token™ offers the opportunity to invest in sustainable timber production, allowing the cultivation of market gardening plots in the shade of the Paulownias, for the benefit of the people and the biodiversity as a whole.

The program is based on the fastest growing Paulownia tree in the world.

Welcome to the first financing system that combines real agroforestry products with smart value-for-money contracts to create wealth for all.

Paulownia wood

Used for interiors and furnishings of luxury yachts or high-end cruise ships, it makes its way into private aircraft interiors and is the basic material for the construction of furniture and accessories for the high-quality house.

Used in the production of valuable musical instruments, as well as very durable and premium sporting goods.

Whether in the furniture, construction and trade or energy services industries, Paulownia Wood meets the growing demand in a wide variety of economic sectors.

It has more medicinal and cosmetic virtues and is extremely melliferous...

ROI

With good cultural management and optimum sunshine 1 Paulownia over 10 years can produce 1 cubic meter of wood.

At the end of the year 2018 the price of the Paulownia cubic meter:

- China producer: **\$ 350 - \$ 1100** | alibaba.com

- Europe producer: 1 meter³ FOB Bordeaux = **750 € and 1500 €** | espaceagro.com
